Lesson 01 Demo 01

Creating the First Java Program

Objective: To create the first Java program
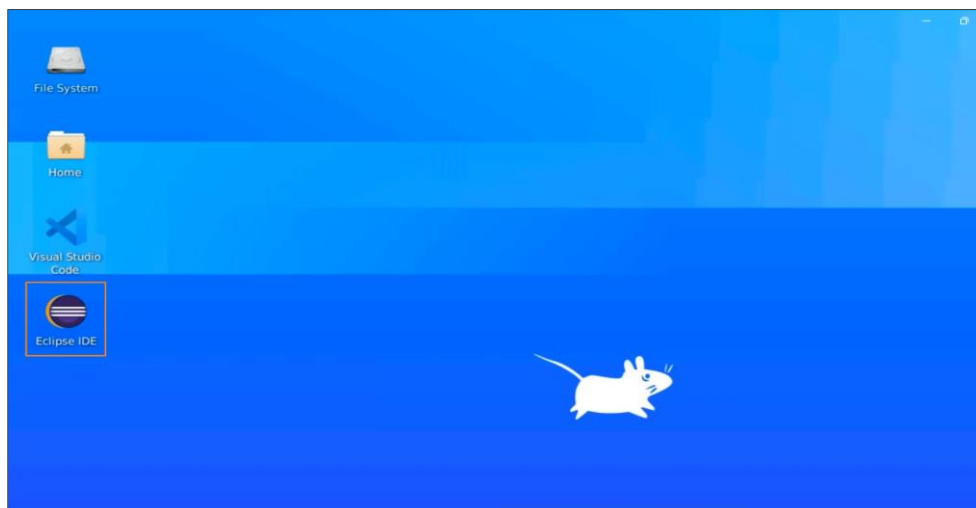

Tools required: Eclipse IDE

Prerequisites: None
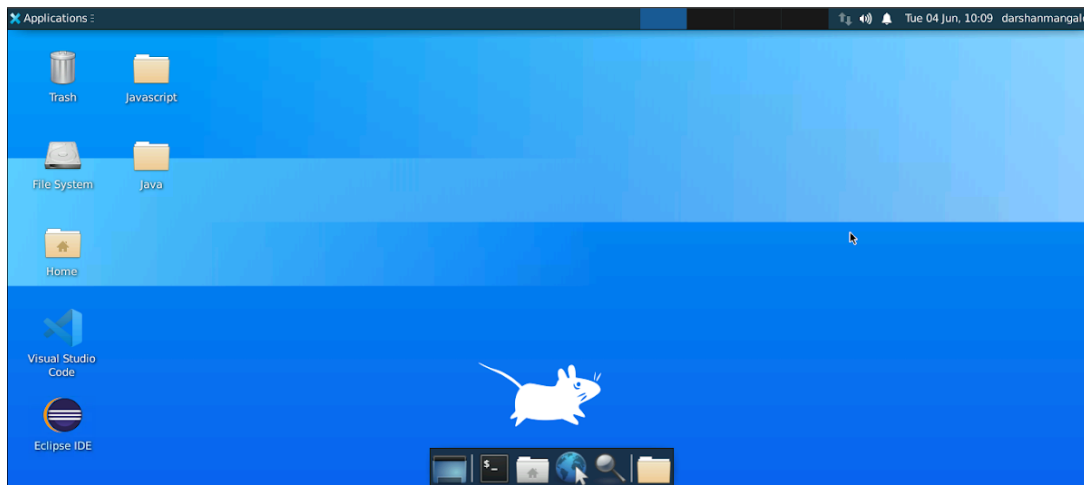

Steps to be followed:

1. Create a folder on the Eclipse IDE
2. Create the first program in Java
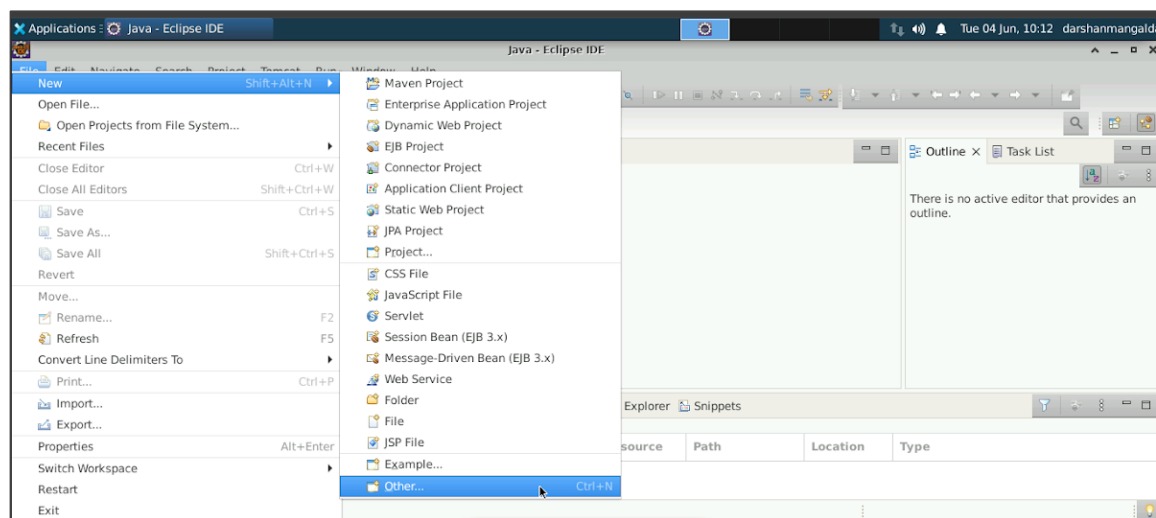

## Step 1: Create a folder on the Eclipse IDE

1.1 Open the **Eclipse IDE**

1.2. Create a folder on the desktop with any name of your choice let us say **"Java"** and open this folder with the **Eclipse IDE**

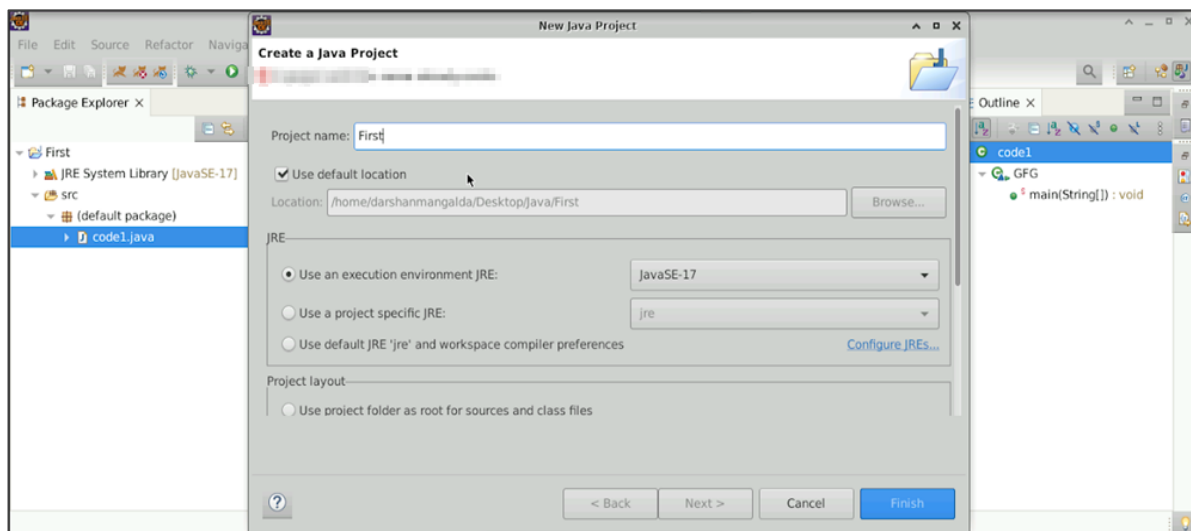

1.3. Select **File**, then click on **Other:**

1.4 Select **Java Project** in the **Select a Wizard tab:**

1.5 Name the Java Project as **First** in the Project name field and click on **Finish** Button

1.6 Right **Src** folder, select **New,** and click on the **class** option:

1.7 Enter the name in the Java class as **code1,** make sure **the** public option is checked, and
click on **Finish** Button
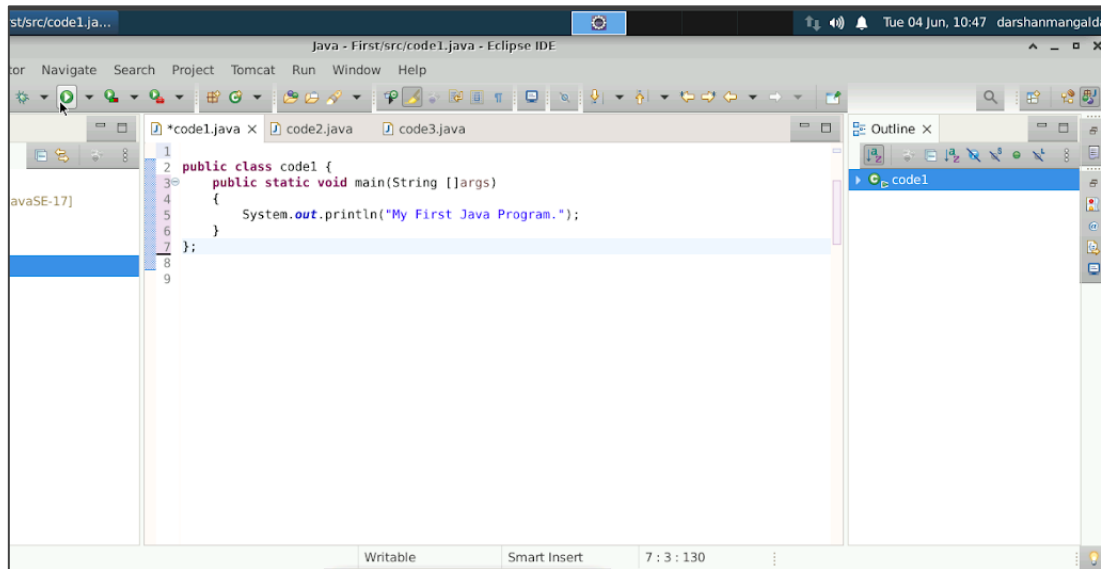

Step 2: Create the first program in Java

2.1 The Java file will open and appear as shown below:

2.2 Enter the code for the first Java program:

2.3 Click on the **Run** Button to execute the code:

The output of the first Java program can be seen in the Console field as shown below:

By following the above steps, you have successfully Created the First Program in Java.
